Waste Receptacle — Leak-proof molded polyethylene. Removable for servicing. Capacity: 0.5-gal. (1.9-L).

OPERATION:

Doors unlock with key provided and swing open for servicing. Toilet seat-cover dispenser holds 500 single- or half-fold paper covers. Receptacle is removable for servicing. Unit holds two standard-core toilet tissue rolls up to 5-1/4" (135mm) diameter (1800 sheets).

Designer's Note: It is recommended that one full toilet tissue roll remain wrapped until the other roll has been depleted to avoid wasting ends of both rolls.

INSTALLATION:

Provide framed rough wall opening 26-5/8" (675mm) wide, 12-5/8 (320mm) high. Minimum recessed depth required from finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits in wall. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an S, then secure unit with #8 x 1-1/4" (4.2 x 30mm) sheet-metal screws (not furnished).

Designer's Notes:

1. Surface-mounted B-3091 mounts on left side of toilet (when seated on toilet).
2. For unit to mount on the right side of toilet (when seated on toilet) see model B-3092.
3. For visual placement of models inside toilet compartment, refer to Technical Bulletin TB-92.
